

6516208069.txt

I got so bored with the local radio stations with all the talk and commercials. I decided to pay for my music, traffic and weather channels. It's great. I get a variety and quality in what I choose to hear. How dare the National Association of Broadcasters tell me what I am supposed to hear. Please reject NAB'S Petition 04-160 and support XM, who can give our country the kind of programming that we demand.

Thank you.
